## Add users through the add-in

1. When inside the add-in (if you have the add-in administrator role) a burger menu in the top right corner will appear.
2. Click it and click users
3. Here you can click "+User"
4. Fill out the fields and click "create"
5. This will create the user with the required role and send an email to the user with username and password in it.
6. The user will be asked to change password when logging in for the first time.
